DOSING

Use the dose recommended by your prescribing doctor. The dosing table below is an example of possible dosing. LozaCan®50 lozenges should be taken daily. Do not exceed the recommended dose of 6 lozenges per day. It is recommended to use a “Start Low and Go Slow” approach to minimise any potential side effects.

TITRATING DOSE

1. Begin titration as per table.
2. Once the desired symptom control has been achieved, the optimal dose has been found.
3. Record in your dosing diary.
